

HAMZA AKRAM

Depalpur, Okara, Pakistan | 0308-8861737 | hamzasworkspace1@gmail.com | github.com/hamzaworkspace786

Professional Summary

Final-year IT student and focused full-stack developer with hands-on professional experience building real-time web applications using React.js, Next.js, and Node.js. Completed a software internship at Innovi Global and shipped multiple production-grade projects — including Nexus, a full SaaS collaborative whiteboard platform built as a Final Year Project. Currently sharpening problem-solving foundations through Data Structures & Algorithms in C++. Passionate about writing clean, performant code and integrating AI-assisted tools into modern development workflows.

Education

Bachelor of Science in Information Technology

Dec 2022 – Jun 2026

University of Okara · Renala Khurd, Okara

Relevant Coursework: Data Structures, Algorithms Analysis, Software Methodology, Database Management, Software Requirement Engineering, Computer Architecture

Experience

Web Development Intern — Innovi Global

Lahore, Pakistan · Jun 2025 – Aug 2025

- Collaborated with the frontend team to build responsive UI components using React.js and Tailwind CSS, reducing design-to-code turnaround by ~20%.
- Integrated RESTful APIs to fetch and render dynamic data, improving interactivity across 3 key product features.
- Participated in daily stand-ups and code reviews; managed feature branches using Git in an Agile sprint workflow within a team of 6 developers.
- Optimised legacy components for performance, achieving measurably faster page load times on low-bandwidth connections.

Projects

Nexus — Real-Time Collaborative Whiteboard SaaS · Next.js, TypeScript, Liveblocks, WebRTC, Better Auth, tldraw, Framer Motion 2025 – 2026

Final Year Project · Deployed on Vercel

- Architected and shipped a full SaaS collaborative whiteboard platform inspired by Miro and FigJam, supporting multi-user real-time canvas editing via Liveblocks sync engine.
- Implemented peer-to-peer voice chat using WebRTC, enabling live audio communication between collaborators without third-party services.
- Built a complete authentication system using Better Auth with Google OAuth support, including protected routes, session management, and role-based access.
- Integrated tldraw as the core canvas engine with Framer Motion animations throughout the dashboard, settings page, and onboarding flow for a polished UX.
- Designed and developed a full product experience — including user dashboard, shareable board links, and a settings page — mirroring real-world SaaS product architecture.

Portfolio Website · Next.js, TypeScript, Framer Motion, Tailwind CSS

May 2026

- Designed and built a personal portfolio site with smooth page transitions and scroll-triggered animations powered by Framer Motion.
- Leveraged Next.js App Router and TypeScript for type-safe, SEO-optimised static pages with fast cold-load performance.
- Deployed on Vercel with a custom domain, fully responsive layout, and optimised assets across all screen sizes.

Signalist · Next.js, TypeScript, Financial APIs

Jan 2026

- Built a real-time financial alert app delivering instant stock market notifications to subscribed users.
- Implemented automated daily email digests and breaking news alerts, reducing manual market monitoring for end users.
- Integrated 3rd-party financial APIs for live stock data and dynamic charts; used SSR for sub-second initial load times.

Subscription Tracker API · Node.js, Express.js, MongoDB

Feb 2026

- Engineered a production-ready RESTful API with full CRUD support for managing recurring user subscriptions.
- Secured all endpoints with JWT authentication and bcrypt hashing, ensuring data privacy across user sessions.

- Designed a scalable MongoDB schema to handle concurrent multi-user subscription records efficiently.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, C++, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js (App Router), Node.js, Express.js, Framer Motion, Tailwind CSS, tldraw

Real-Time & Auth: Liveblocks, WebRTC, Better Auth, Google OAuth, JWT, REST APIs

Databases & DevOps: MongoDB, PostgreSQL, Git, GitHub, Vercel, HttpPie

AI & Developer Tools: GitHub Copilot, Claude (Anthropic), Google Gemini, VS Code, Google Antigravity

Currently Practising: Data Structures & Algorithms in C++ — 3+ months (arrays, linked lists, stacks, queues, trees, recursion)

Leadership & Activities

Class Representative — University of Okara

2022 – Present

- Serve as the primary liaison between faculty and a batch of 50+ students, ensuring clear and timely communication on academic matters.
- Organised academic workshops, seminars, and social events to foster student engagement and community building.
- Resolved student grievances through collaborative problem-solving with university administration, demonstrating strong conflict-resolution skills.
